

The federal government pays \$59,500 a year in salaries to territorial officials appointed by the president, according to a statement prepared by Territorial Secretary Mott-Smith for the secretary of the interior. The governor of the territory receives \$7000 salary and \$1500 for incidentals and traveling expenses, his private secretary \$2000 a year; the territorial secretary \$4000; chief justice of the supreme court \$6000 and the two associate justices \$5500 each and the seven circuit judges \$4000 each.

To Please Your Best Girl

The history of man may be described as a struggle to provide for his best girl.

"Our best girl" wields more power in secret in a week than the ballot can give her in a decade.

It is a girl who first makes a man particular in the choice of his neckwear and about the cut of his clothes.

And he who has never contemplated himself in a new outfit and wondered how "she" would like it, is to be envied if he's twenty and pitied if he's forty.

Now you know these things as well as we do; you know that well selected shirts and pretty ties are helpful in affairs of the heart, and don't you realize that they can be as helpful in affairs of business?

Now this is a long way round to what we want to tell you, but don't you usually go the long way round with your "best girl?" It's surely the sweetest way, so we consider this the best way, and are content to draw this little homily to a close with the observation that our "Fixings" are sure to create the best impressions in all walks of life.

Shirts, \$1.25 to \$2.50
Ties, .25 to \$1.50

In Business Circles---News and Review

MODERN FISH MARKET WOULD COST \$40,000

A modern fish storage plant to cost in the neighborhood of \$40,000 is being planned for Honolulu. Charles Chillingworth, attorney and interested in many local enterprises, is working on the project at this time and has advised with Dr. J. B. Pratt, president of the board of health, concerning it.

Efforts are now being made to reduce the cost of construction of such a plant, as their present scheme of building calls for an expenditure of more than \$55,000. Believing that sum is excessive, the tentative plans are being gone over now. If it can be shown that the plant can be put up at a considerably less price, the project will probably be advanced at once.

The one purpose of the plant is to store fish. There is now no place in town, it is said, available or suitable for that purpose. Merchants at the fish market often have great difficulty in finding their fish to keep them in good conditions for sale the next day. In such a storage plant the fish could be kept for almost an indefinite time.

Mr. Chillingworth is enthusiastic about his scheme. "I believe it is exactly what is needed here," he said yesterday. "The only obstacle we have in front of us now is the cost. If we can cut that down, to insure us a good interest on our money, we will no doubt go ahead at once."

The fish market men are also enthusiastic about the plan.

STOCK MARKET IS REGAINING ITS CONFIDENCE

"The stock market," says Henry Clews in his last bulletin to reach here, "displays a more confident undertone than has been the case in the last eleven months." It continues to say that the probabilities of the currency bill passing this session of congress seem much better, and that the tariff problem has been discounted to a large extent. He says:

"Prices have shown a considerable rise, and realizing spells must now be expected, particularly on stocks which have led the advance. The rise, however, has been very uneven, and is likely to be carried still further, should the harvest prove satisfactory and monetary developments continue favorable. The tariff problem has been discounted and almost forgotten, the public having wearied of doubt and uncertainty. This question nevertheless will soon be settled. The worst is already known, and when the final decision is made business may be expected to take a fresh forward start. In many lines shelves are exceptionally bare because of enforced contraction in buying for almost a year. When uncertainty is over a rush of orders is to be looked for. The outlook for the currency bill grows more favorable, and the known determination of the President to secure a bill this session, if possible, materially strengthens the possibility of success. The Senate promises to be the chief obstacle."

"So far as the future is concerned, indications point to a broader, more active and generally improving market. Reactions will be more frequent, and the crop outlook must be closely watched. Developments at Washington may also have an important effect upon values, either for the rise or the fall."

TARIFF ON BANANAS IS NOW OPPOSED

Some opposition which appears to be growing is being felt against the proposal to put a duty on bananas in the new tariff schedule. Just how much the plan to tax this fruit at five cents a bunch would affect its price on the mainland is a point which has not been foreseen.

Certain foreign countries, producers of bananas, are using their influence to knock out the banana duty. Jamaica, largely dependent upon the sale of its fruits for sustenance, has sent a delegation to Washington to make a protest against the proposed tax, which, if enforced, may ruin the principal industry of their country, they say.

Banana consumption in the United States is rapidly increasing. Approximately forty-one million bunches are brought to the mainland each year.

Opponents to the banana schedule declare that by imposing a five cent tax on the fruit, the trade will be influenced and the great bulk of the bananas now sent to the United States will be diverted to other countries, and thereby have a much greater effect upon the price than the mere tax alone.

DEBATE ON SUGAR SCHEDULE KEEPS LOCAL MARKET QUIET

Little Trading Is Anticipated Until Outcome of Consideration of Tariff Measure Is Made Public — Buyers and Sellers Are Reluctant to Act

With the debate on the sugar schedule in the Wilson-Underwood tariff bill going on in Washington this week, local stock-buying and -selling has been at a low point, where it is expected to remain until the outcome of the debate is known and the sugar tariff agreed upon.

Reluctance to sell at this time, when the tariff question seems to be so near settlement, and hesitance to buy in the face of the threatened cut in the tariff on sugar, the two elements needed to enliven the market have been wanting this week. Owners of stocks who bought at prices much higher than quoted now are holding on in the hope that their proposed sugar schedule will be defeated, and buyers are not pushing them to sell. Consequently little business has been done this week. Eyes have been turned toward Washington where the debate is on. As holders have not forced the sale of their stocks, or buyers shown much eagerness to buy, prices have displayed only nominal fluctuations in sugar stocks during the six-day period ending Friday.

The feeling that when the Underwood bill is finally disposed of, business in all lines will pick up here is being expressed with much confidence. Not only do the brokers and business men state that the market will become more active and stocks gain in value, but that all other lines will see better times in waiting for them. It is now felt that this will be true, whether or not the present sugar schedule goes through. With its settlement, one way or another, readjustments can be made in all lines and business can lift a stride toward sound and enduring conditions.

Hawaiian Commercial was the heaviest seller during the week, 300 shares of it going in one sale to San Francisco. It kept to its price of 26.75 during the six-day period. The proceeds for the sales during the six-day period ending Friday show the business of the exchange for that time to have amounted to \$18,199. The shares sold numbered 968, of which number 518 were Hawaiian Commercial. During the same period last week the proceeds of the sales of stocks amounted to \$33,748, 1167 shares changing hands.

In only one sale did Hawaiian Commercial vary from its price obtaining throughout the week. Five shares went Monday at 27; at all other sales sold at 26.75. Of the eight shares traded in, only three changed prices, as shown by the reported sales. They were Hawaiian Commercial, Hon. B. & M. Co., and Pines. The fluctuations in Hon. B. & M. Co. were slight. At its first sale it went at 26.62½, at the next transaction it rose to 27, and at the last sale reported it went at 26.75. Pines, on the other hand, showed good gains. During the week it rose from 32.50 to 34.25, almost two points. Only a few shares of it, however, were sold.

Oahu traded in throughout the week stayed at 1.62½. Two hundred and fifty shares were sold. One sale of Oahu was made; its price was 14. Onomea also showed but one sale; it went at 21.75. Pioneer stayed at 19.25, and Mutual Telephone at 20. The deals in most of the stocks were small. In the four sales made of Pines only 20 shares changed hands; in the Mendocino, the same number, and in Pioneer, five. The largest sale, both in the point of money involved and the number of shares, was in Hawaiian Commercial, when 300 shares changed hands.

The exports of coffee from Puerto Plata for the crop year just past (October, 1912, to May, 1913, inclusive) totaled 608,708 pounds, of which 464,223 pounds went from Puerto Plata, 35,334 pounds from Monte Cristi, and 108,552 pounds from Sanchez.

None was exported from Samana. Dominican coffee resembles Porto Rican, and it is thought might take a like high rank in the world's markets were it handled with sufficient care. Considerable quantities are used in the United States, but, it is understood, in blends whose composition is unknown to the consumer. During the calendar year 1912, out of 1,864,422 pounds exported from this district, 1,393,181 went to the United States. What part of this was consumed there is not known here.

Tenders for the building of a kitchen and dining room at the Makiki fire station called for by D. K. Inoué, Jr., city and county clerk, will not be opened until the next meeting of the city fathers, August 28. Several bids for the work were submitted August 20th.

LIMITATIONS OF A TOOTHBRUSH

Ask your dentist if the toothbrush alone will maintain the absolute cleanliness which is necessary to keep the teeth and mouth free from disease. He will tell you "No."

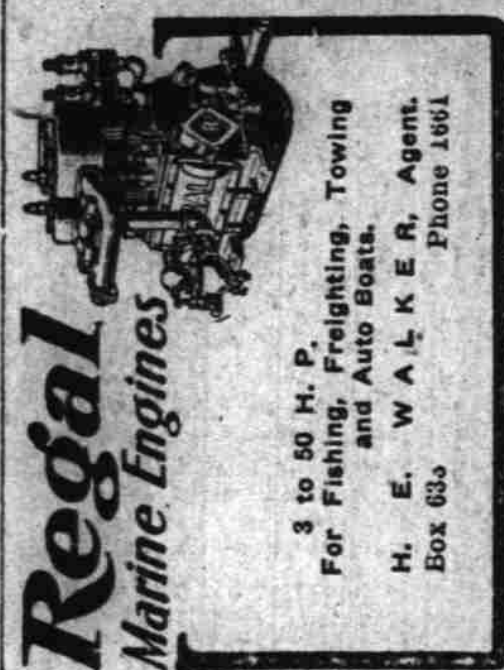

The crevices between the teeth and the junction of teeth and gums furnish lodging places for multitudes of microbes. They are out of the bristles' reach and you could no more dislodge them with a toothbrush than you could clean your carpet with a rake. The toothbrush is indispensable to mouth cleanliness; but it should be supplemented with a reliable antiseptic mouth wash and gargle, which will bubble into crevices, rooting out and destroying disease-producing bacteria and such decaying matter as the brush fails to remove.

The best antiseptic to use is LISTOGEN. It goes farther than Peroxide of Hydrogen by uniting with that most efficient germ destroyer the remedial and antiseptic properties of Thymol, Menthol and Eucalyptol.

These valuable elements take up the work where Peroxide of Hydrogen leaves off and with their help LISTOGEN not only destroys the germ, but in some degree repairs the damage that has been done.

Ask your druggist for LISTOGEN. You will delight in the purifying, refreshing sensation that it gives. 25 cents, 50 cents and \$1 a bottle at

MONETARY CRISIS DANGER PAST, SAYS CLEWS

Henry Clews sees a safe passage of the monetary crisis which was feared would strike the country in the fall. Mr. Clews begins his bulletin, under date of August 9, with the following:

"The danger of a monetary crisis this coming autumn has passed. For this welcome reassurance Secretary McAdoo is chiefly responsible. By making it plain on repeated occasions that the Treasury would do its utmost to relieve monetary pressure when crop and trade demands begin, he materially lightened the burden of the banks and enabled them to lend with far greater freedom than was dreamed of; thus averting a blockade of the wheels of commerce at the critical season when they are invariably running at high speed. His latest offer to put out \$50,000,000 of Treasury funds available for bank reserves adds immensely to the loaning abilities of the national banks, especially in case of the smaller country institutions which are required to carry only 15 per cent of reserves. It is estimated that by this means the credit facilities of the country will be expanded about \$200,000,000 to \$300,000,000, the effect of which is already seen in easier rates for time money, a better demand for commercial paper, and a general revival of confidence in banking circles."

"Of course much credit for the present improvement must also be attributed to the banking community for their persistent application of the brakes. In consequence there has been a general liquidation and contraction that is proving wholesome. There has been a decided stoppage placed upon all imprudent enterprises. The demand for new capital which threatened to bring on a serious crisis has been powerfully restrained for good; and the net new issues for July and August will show a large decline compared with previous years. In brief, the financial world has been taking the rest cure and is already much invigorated in consequence."

No delay in regard to this. Our attorney says that this is the only legal way to do it. It seems a little strange that it must be done in this way, but I presume we must do what we are told by our legal adviser."

Oliver G. Lansing has purchased two lots from James T. Leach, located at Oloku, Honolulu—lots 15 and 25 in the Mendocino tract, containing 4421 square feet. The purchase price was \$2600. The deed was placed on record this week.

A new hotel to be located at the beach and made the most complete and up-to-date hostelry in the city is the plan now announced by J. H. Hertsche, who resigned as manager of the Young Royal Hawaiian and Moana hotels this week. His resignation takes effect immediately. In three weeks he will sail for the mainland, he says, to secure financial backing for the enterprise. The property he

has now approved the contract signed in London last September by the director of the Norwegian Telegraphs and the Marconi Wireless Telegraph Co. Stations will now be erected near New York and Stavanger for the direct transmission of radiotelegraph messages.

Arguments that if the present proposal to have free sugar in the United States is carried out Hawaii will turn from that industry to fruit growing are being advanced on the mainland where it is pointed out that Jamaica, once a sugar producing country, is now engaged also exclusively in fruit growing due to the action of England in removing the duty on the product in her domains; and that Hawaii will follow Jamaica's lead.

The annual meeting of the Oahu Railway & Land Company will be held in the rooms of the company, Stangenwald building, at eleven o'clock Monday morning, August 25, at which time officers will be elected to serve during the coming fiscal year. Members of the retiring officers, as well as others of interest to the company, will be present. The present officers of the company are: B. F. Dillingham, president; M. P. Robinson, 1st vice president; H. M. von Holt, 2d vice president; P. A. Schaefer, 3rd vice president; W. F. Dillingham, treasurer, and A. W. Van Valkenburg, secretary.

Notice of an assessment of ten cents a share on the Mountain King stock has been received here. Accompanying the notice, which was received by Malcolm McIntyre, a letter was received from W. S. Miller, president of the company. He stated that the mine was in excellent condition. The purpose of the assessment, as given by Mr. Miller, is to reorganize and begin operations on the mine at once. Speaking of the assessment and former assessment, he says:

"On the calls which we have made heretofore it is our intention to pay back to all who have paid the calls, fifty per cent of what they have paid. Our attorney, however, tells us that the assessments must be paid in full and then we can remit the difference, and I shall personally see that this is done for all who have paid their assessments in full. That is, upon receipt of their check or draft for payment of assessment in full, there will be a check or draft for half of the call mailed at once. There will be

CASTORIA

for Infants and Children.

Save the Babies.

INFANT MORTALITY is something frightful. We can hardly realize that of all the children born in civilized countries, twenty-two per cent, or nearly one-quarter, die before they reach one year; thirty-seven per cent, or more than one-third, before they are five, and one-half before they are fifteen!

We do not hesitate to say that a timely use of Castoria would save a majority of these precious lives. Neither do we hesitate to say that many of these infantile deaths are occasioned by the use of narcotic preparations. Drops, tinctures and soothing syrups sold for children's complaints contain more or less opium, or morphine. They are, in considerable quantities, deadly poisons. In any quantity, they stupefy, retard circulation and lead to congestions, sickness, death. Castoria operates exactly the reverse. It causes the blood to circulate properly, opens the pores of the skin and allays fever.

The signature of *Dr. J. C. Fletcher* guarantees genuine Castoria. Physicians Recommend Castoria.

"I have used your Castoria for years and I frequently prescribe it, and always obtain the desired result." *Dr. J. C. Fletcher, M. D., Buffalo, N. Y.*

"I have prescribed Castoria to families for several years. It is all right. Mothers like it, for children will take it without any trouble." *Dr. J. C. Fletcher, M. D., Buffalo, N. Y.*

"I have used your Castoria on various occasions suitable cases and have found it a pleasant and efficient laxative, especially in the various diseases of childhood." *Dr. J. C. Fletcher, M. D., Buffalo, N. Y.*

"Your Castoria is a splendid remedy for children, known the world over. I use it in my practice and have no hesitancy in recommending it for the complaints of infants and children." *Dr. J. C. Fletcher, M. D., Buffalo, N. Y.*

Children Cry for Fletcher's Castoria.

In Use For Over 30 Years.

THE CASTORIA COMPANY, 11 BROADWAY, NEW YORK CITY.

is believed to have in mind to purchase that is owned by W. G. Irwin at Waikiki, one of the most beautiful locations at the beach and valued at about \$300,000.

One of the effects of the delay of Washington in recognizing the new president of Mexico is shown in the money exchange. At El Paso the Mexican dollars or pesos are only worth 42 cents. This is the lowest rate banks have quoted on Mexican money for a very long time.

The Balkan struggle has so far cost approximately \$1,250,000,000. One of the leading financial papers of England, arguing for the discontinuance of war loans, says that during the last nine months Roumania has expended about \$60,000,000 on mobilization and armaments, while Austria-Hungary and Russia have provided \$200,000,000 for like purposes. Italy, which started the trouble by its attack on Tripoli, has also suffered heavily.

A rabbit-canning factory has been started in Argentina, the tins being exported. The furs of the animals are sold to an Argentine hat factory. Rabbits have become a pest in Buenos Aires Province.
